Your Partner in Data Management

My services

Highly skilled Data Solution Designer with expertise in data warehouse design and implementation. Proficient in utilizing advanced data modeling techniques to optimize data storage and retrieval processes. I will help you:

- increase your data accuracy and improve core data architecture processes for your users to access high quality data

- give you strategic advise on applying standardised frameworks to your software development processes to produce higher quality and resilient system e.g data governance, metadata management, data quality checks, enterprise data models (EDM)

Tailored Roadmaps

I create a journey towards data modernization that aligns with the needs and challenges in Asset & Wealth Management

Decade of Expertise

With over 10 years experience in the field, I embody a passion for modernizing business intelligence technologies.

Proven Success

My track record with clients like Universal Investment , Lombard International and Clearstream Deutsche Börse Group
About Me

JUSTYNA KMIECIK

Manager - Senior Solution Architect | Executive MBA Candidate in Data Science at Goethe Business School
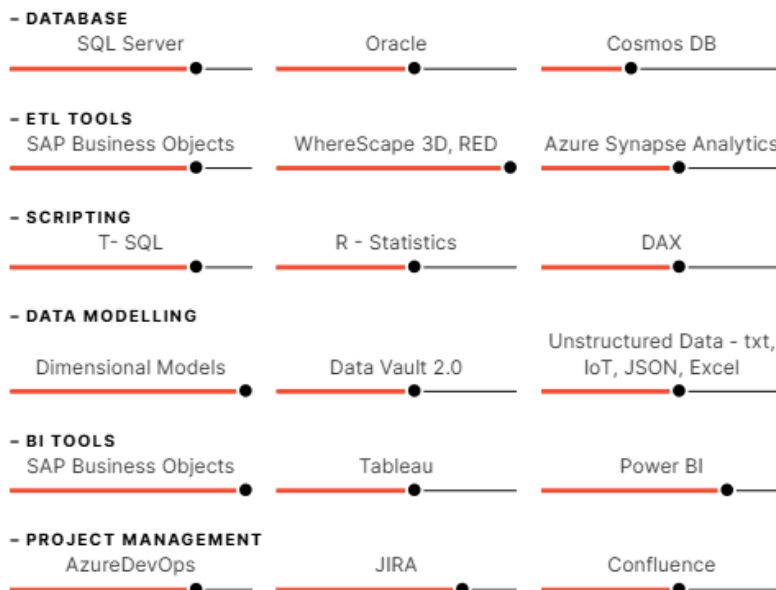

"I bring personal commitment to each project. I am your Strategic Partner in your modern data journey."

justyna.kmiecik@fastdataconsulting.com

FAST DATA CONSULTING

Portfolio

Data Strategy

Analysed and created a Data Modernisation Strategy to tackle low performance in Reporting Tool (Tableau) and siloed data problems in legacy systems across the Enterprise.

✓ Reports generated in Tableau with 1 min generation time instead of 2h

✓ Automated 100% of data integration tasks (mapping and data load)

ETL and Data Mart Design

Developed and implemented ETL processes for reporting and BI self-service features using SAP Business Objects, Designer, Cloud, and Microsoft Server SQL (T-SQL)

Pioneered ETL and Reporting Automation processes using workflow manager and T-SQL to create a Reporting Platform for Alternative Investments

✓ Pioneered an "early warning system" for data quality issues using Splunk improving by 40% data integration

✓ Reduced ETL processing time by 50% by optimizing data pipelines

Business Intelligence

Implementation of new connectivity technologies Xact to streamline data transmission with over 60 global markets for Clearstream

Conducted in-depth analysis of large datasets to produce actionable insights and reports for senior management, ultimately improving decision-making processes

✓ Led cross-departement teams to define an Enterprise data governance and data management strategy

✓ Significantly reduced NAV calculation time by automating accounting reports from 200 custodians
